A Series 3-Wheel Electric Lithium-ion Stand-up Counterbalanced Forklift

with capacity of 3,000 to 5,000lbs

Making Material Handling Easier
 SINCE 1956

2025 VERSION 3/COPYRIGHT 2025

LET THE LITHIUM POWER TAKE OVER

INNOVATIVE SOLUTIONS NEW POWER NOW

Lithium-ion technology (Lithium Iron-Phosphate), was developed jointly by HANGCHA and a leading Lithium Iron Phosphate cell manufacturer for use in material handling equipment applications. These innovative and reliable battery cells and modules are manufactured to the highest standard for HANGCHA's forklift line.

- / **Battery Technology:** We use square Lithium Iron Phosphate cells. These are the same type of batteries used in new electric vehicles.
- / **Design:** The module uses a sturdy and lightweight aluminum alloy frame. It is also designed to provide excellent heat dissipation.
- / **Safe and Effective:** Charging efficiency as high as 98% and the thermal runaway temperature is at 600 °C and above.
- / **Adapted to Low Temperatures:** Comes standard with an electrical heating feature, ensuring normal operation in low temperatures.
- / **Quick Charging:** Fully charges in 2 hours.
- / **Efficient:** Can use opportunity charging to allow for continuous use in multi-shift operations.
- / **Long-Lasting:** 4000 charging cycles with a capacity retention greater than 80%.
- / **Maintenance-Free:** Lithium-ion batteries do not require manual maintenance such as watering.
- / **Green and clean:** The batteries are pollution-free, release zero emissions, and are recyclable.

RAPID CHARGING

Rapid and opportunity charging ensure continuous availability of material handling equipment

The chargers allow for fast full charging or boost charging (100 % charge in 2 hours). The lithium-ion batteries are maintenance free and do not require a battery change when used in multi-shift operations. Instead, the batteries can be charged during user breaks and shift changes which allows the forklift to continuously run during multi-shift operations.

**Standard Charger
(48V/200Ah)**

HANGCHA PROVIDES UP TO A
7 YEAR OR 15,000 HOUR GUARANTEE
ON THE LITHIUM-ION BATTERY PACKS.

Reliable
Smart

Appearance

/ The A Series 3-Wheel Stand-Up Counterbalanced Lift Truck is designed to stack and retrieve goods efficiently in narrow aisles and at high lift heights while still maintaining a lifting capacity of up to 5,000lbs. The exterior of this forklift is powder coated in a durable, easy to see, green finish designating it as lithium-ion powered.

Comfort

/ The user operates this forklift while standing in a side stance.
/ The step is low for conveniently getting on and off the forklift.
/ An anti-fatigue floor mat and generous padding for knees, hips, and arms keep operators comfortable over long shifts.
/ The spacious operator compartment provides a comfortable work environment for the operator.

High Performance

/ Thanks to the advanced front dual-drive AC motor, the traveling performance, maneuverability, and operating efficiency are greatly improved.
/ Hangcha's AC hydraulic system provides smooth load handling and precise load placements.
/ The electronic proportional multi-way valve reduces energy consumption.
/ Electric Power Steering provides precise steering control with minimal effort. It also does not encroach into the operator compartment.

Safety

/ Cornering speed control automatically slows the forklift's travel speed while turning to help prevent damage to loads.
/ Operation is easy thanks to the foot-raising brake pedal.
/ The electronic parking brake greatly improves the safety of the truck and the operator.
/ With the pedal sensing system, the truck can be driven only if the operator stands on the pedal. If the operator takes their foot off the pedal, active braking is initiated to prevent an accident.

Reliability

/ The vehicle's frame is robust and reliable thanks to its high-strength steel frame structure.
/ All of the forklift's wires and cables are protected. This greatly improves the reliability of the electrical system.
/ Switches, connectors, instruments, and other key parts are all high-quality products with excellent performance and quality.

The wide view mast provides great visibility. The hydraulic cushioning feature provides confidence and smooth load handling while operating this forklift.

Ergonomic: The truck is designed for maximum operator comfort while traveling forward or backward in a side stance position. The back and elbow supporting cushions provide better support for the operator.

The battery side roll out is a part of the standard configuration.

The intuitive, multifunction control handle is centrally positioned for easy access. The handle offers simultaneous control of the drive, lift, lower, and auxiliary hydraulic functions.
